

## Web Based Technologies –HW#2

### About the Assignment

Implement a web page that has functionality like wordpres:

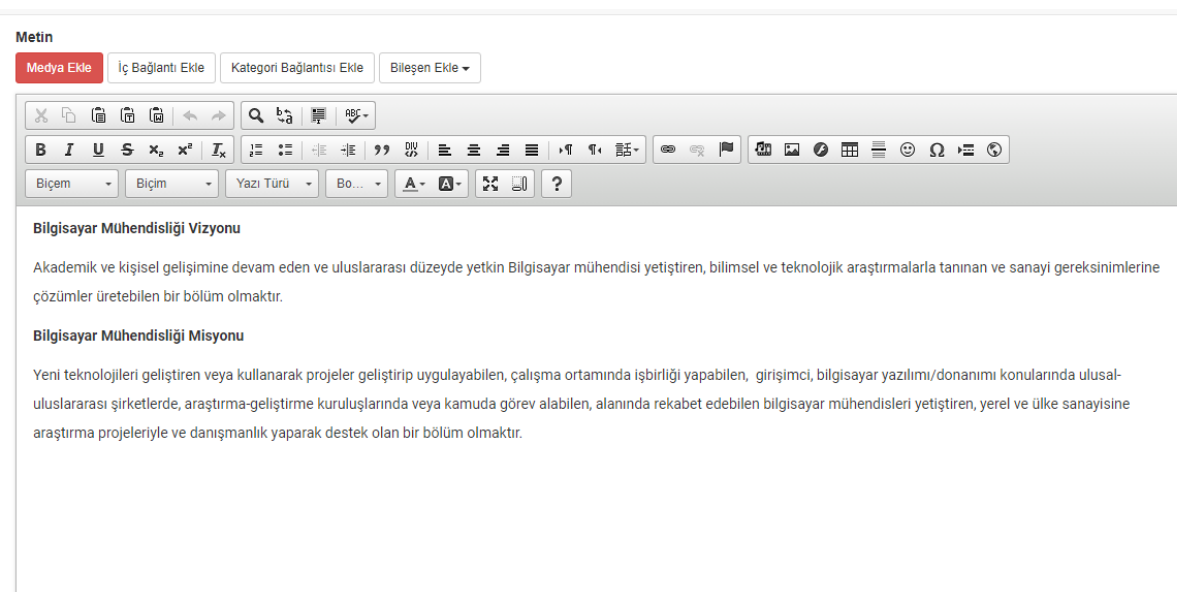

- If the admin is logged then he/she should able to change the content of a web page.
- The other users should only see what are displayed on page content.

For instance, the users only see the content of page given in Fig. 1.

<https://ceng.ogu.edu.tr/Sayfa/Index/12/vizyon-ve-misyon>

However, the admin is able to modify the details of content as shown in Fig. 2

## Task:

You are expected to implement a web page content that provides this functionality. This task can be fulfilled by using asp.net rich text editor. You can use any code.

Ex1: <https://www.syncfusion.com/jquery/aspnet-web-forms-ui-controls/wysiwyg-rich-text-editor>

Ex2: <http://richtexteditor.com/>

Your homework will be graded based on your design.

Only send asp.net files like below. Send with shortest name and **Zip** format. Don't sent all project.

### Example; Name-Surname-HW#.Zip
